

1Click SMT Made Successful Installation and Training For Thai Customer!

Recently, our engineer Peter went to Thailand to provide after-sales support for our customer.

In these days, we had installed a SC-900 selective coating line . Moreover, Peter gave patience and meticulous training to their staff, make sure they master the machine usage .Customer and agent are satisfied with our support and give their affirmation to us.

SC-900 is a [high Performance 4 axis Selective Coating Machine](#) ,which is equipped with high precision servo control system , various valves , CCD system ,material tank weight detecting system etc, which can provide a high efficiency conformal coating process .The maximum coating size can reach 400mm*450mm with SC-900.

So far, we've installed several dozen conformal coating line all over the world. It have excellent stability and performance. Check below link to get more info!
